RADIO API VOICEOVER SCRIPT

Ref. No. : TD/2/2020

Topic : Proper use of crane lorries / 正確使用吊臂車

Cantonese V/O script:

女: 司機,你諗住就咁開車呀?

運輸署都有提醒,用完車上嘅吊臂,要檢查清楚吊臂係咪已經收番去原本靜止嘅位置。未收好吊臂就開車,會對其他道路使用者構成危險,仲可能會損毀道路設

施架!

男: 一時大意唔記得添!好彩你提我咋!

女: 不如裝個警示系統,提醒你開車前收好個吊臂啦!

男: 好提議喎!

Putonghua V/O script:

女: 司機,你這樣就開車了?

運輸署不是說了嘛,用完車上的吊臂後,要檢查清楚吊臂是否已經放下,回到靜止的位置。吊臂沒收好就開車,會對其他道路使用者造成危險,還可能會損壞道

路設施!

男: 一時大意,幸虧你提醒我!

女: 不如安裝警示系統,提醒你開車前收好吊臂。

男: 好主意!

English V/O script:

Male: A crane attached to a lorry should be lowered and returned to its stowed position after

use. A poorly placed crane can pose a threat to other road users and may damage road facilities. Installing a warning system will help alert the driver if a crane isn't in its stowed position when the vehicle is in motion. The Transport Department reminds crane lorry

drivers to ensure that their cranes are properly stowed before driving.
