(E) Attention and Appeal

Members of the public should pay particular attention to the temporary road closures and public transport arrangements on that day. Due to extensive road closures, the TD anticipates that the traffic in the northern area of Hong Kong Island (including Central, Wan Chai, Causeway Bay, North Point and Shau Kei Wan) and Kowloon East (including Kwun Tong, Kowloon Bay and Prince Edward Road East), and Aberdeen Tunnel, will be more significantly congested when compared with normal Sundays. Motorists are advised to avoid driving to the affected areas, and in case of traffic congestion, motorists should exercise patience and drive with care, and follow the instructions of the Police on site.

Members of the public heading for the affected areas are advised to plan their journeys early to avoid delays, use railway services as much as possible and pay attention to the arrangements of temporary route diversions and relocation of stops. Taxi and minibus drivers heading for Cheung Yip Street or Wai Lok Street for refuelling, please pay attention to the road closures and traffic diversion arrangements implemented in the above areas.

Appropriate traffic signs and traffic aids will be erected to guide motorists. Notices will be displayed by public transport operators to advise passengers of the above temporary traffic and transport arrangements. Actual road closure time will depend on actual finishing time of the event, and complete clearance for safe re-opening of roads to vehicular traffic. The TD and the Police will closely monitor the traffic situation. Other temporary road and traffic control measures, including adjusting the extent of road closure, and alteration or suspension of public transport services may be implemented by the Police at short notice depending on the actual traffic conditions. Members of the public are advised to stay alert to the latest traffic news through the media, or may browse the TD's website (www.td.gov.hk) or mobile application "HKeMobility" for information about the special traffic and transport information, or may also browse relevant public transport operators' website or mobile application for details of service changes.
