The aim of this guideline is to introduce and explain some regulations related to TAXI. Details of the content can be found in the *Road Traffic (Construction and maintenance of Vehicles) Regulations* and *Road Traffic (Public Services Vehicles) Regulations* of the Road Traffic Ordinance (Chapter 374).

I. TAXIMETER

1.1 Every taxi shall be fitted with a taximeter of a design and construction approved by the Commissioner for Transport (refer to as "Commissioner"). No taximeter or instrument similar to a taximeter is allowed to be fitted to a vehicle without the prior approval of the Commissioner.

1.2 If the registered owner of a taxi removes the taximeter from a taxi or ceases to use the taximeter, he should notify the Commissioner within 24 hours of such removal or cessation.

1.3 Every taximeter should be provided with an indicator (or "flag") of a size not less than 100 millimetres by 50 millimetres displaying the words "FOR HIRE" or the word "TAXI".

1.4 Every taximeter should be so constructed that:-

- (i) it may be sealed to the satisfaction of the Commissioner;
- (ii) the fare dial should indicate a clear division between dollars and cents and the words "FARE", "EXTRAS", "H.K. Dollars" and "cents" (or symbols "H.K. \$" and "c") should be displayed as well;
- (iii) the amount of fare calculated by time or distance or a combination of time and distance as prescribed is indicated on the fare dial;
- (iv) the amount of additional fares in progressive increments of the lowest fare as prescribed is indicated on the fare dial;
- (v) the height of the figures indicating the fare and additional fares is not less than 10 millimetres;
- (vi) the fare dial of every taximeter should be capable of being illuminated during the hours of darkness or when required by the hirer, so as to render the readings on the fare dial easily legible;
- (vii) the fare dial clearly displays the position of the taximeter actuating device at whether:
 - (a) FOR HIRE;

- (b) HIRED; or
- (c) STOPPED.

1.5 Every taximeter should be actuated by a device which can cause the taximeter to be set to, and to operate in any one of, the following positions:-

- (i) FOR HIRE, when the taximeter is not recording and the indicator (or “flag”) display is clearly visible to any person standing in front of the taxi at a distance of 20 metres;
- (ii) HIRED, when the taximeter is recording by time or distance or a combination of time and distance and the indicator (or “flag”) display is not visible outside the taxi;
- (iii) STOPPED, when:-
 - (a) the taximeter is recording by distance only and the indicator (or “flag”) display is not visible outside the taxi; or
 - (b) the mechanism of the taxi is not in motion and the indicator (or “flag”) display is not visible outside the taxi.

1.6 The taximeter actuating device should operate direct from the “FOR HIRE” position to the “HIRED” position and passes through the “STOPPED” position before being returned to the “FOR HIRE” position.

1.7 Every taximeter should be tested by the Commissioner before it is fitted to a taxi and thereafter at intervals of not more than 6 months. If the tests prove that the taximeter is satisfactory, and the receipt printing device installed in respect of the taxi is in proper working order, the taximeter will be stamped and sealed by the Commissioner.

1.8 The registered owner of the taxi should report to the Commissioner, as soon as reasonably practicable, any fault or damage to the taximeter fitted to the taxi that may result in any inaccurate recording of the fare, or damage to any stamp or seal of the Commissioner thereon.

1.9 The registered owner of a taxi and the taxi driver should ensure that:-

- (i) the taximeter complies in every way specified in the law;
- (ii) the taximeter is affixed with prior approval of the Commissioner; and
- (iii) the stamp or seal of the Commissioner is in good condition.

Anyone who fails to comply with the above standards commits an offence and is liable to a fine of

\$10,000 and to imprisonment for 6 months.

1.10 Anyone without lawful excuses defaces, damages or alters any taximeter commits an offence and is liable to a fine of \$10,000 and to imprisonment for 6 months.

(Note: All the offences and penalties as listed in the Guidelines is only the most updated terms available when printing is arranged.)

The device, when under proper mechanical condition, should be able to print a fare receipt within 12 seconds. When the receipt printing device is not installed in accordance with the law, the registered owner of the taxi commits an offence and he/she is liable to a fine of \$10,000 and to imprisonment for 6 months.

2.2 Any receipt issued in respect of the payment of any fare for the hiring of a taxi should be printed on a form specified by the Commissioner. The format can be found in Appendix 1. The content of the receipt should set out all the items listed in Appendix 1. The letters and figures of the receipt should be printed in black and blue, each of which is not less than 2 millimetres in height, on a white paper.

2.3 If the receipt printing device is not in proper working order, a fare receipt should be issued by the driver of the taxi by completing in manuscript of a pre-printed form. The format and the content of the pre-printed form should be the same as the sample in Appendix 2.

2.4 When the scale of fares for the hiring of taxis is amended, even if the taximeter of a taxi affected by the amendment has not been converted to record the revised scale of fares, the taxi driver still has to issue a fare receipt to the passengers. The taxi-driver should set out in manuscript, next to the total amount of the fare recorded in respect of such hiring on the taximeter, the total amount of the fare chargeable in accordance with the revised scale of fares.
