

### **Section 3 - Registration and Licensing of Vehicles and Drivers**

This Section provides statistics on the number of vehicles registered and licensed in Hong Kong, drivers and learner drivers, driving tests and taxi licence tenders as compiled by the Licensing Division. The objective of the Licensing Division is to promote orderly regulation of vehicles and drivers.

For enquiries about this section, please call Licensing Division on Tel. No: 2804 2600 and Vehicle Examination Division on Tel.: 2829 5466 of Transport Department.

## Vehicle Examination

The Vehicle Examination Division of Transport Department seeks to upgrade the safety of vehicles through improved design requirements and correct maintenance. Every type of vehicles to be registered in Hong Kong is required to undergo the type approval examination. All commercial vehicles including goods vehicles, buses, light buses, taxis, and trailers are required to undergo pre-registration examination and annual examination. Private cars over six years old are required to have annual examination

There are four Government owned Vehicle Examination Centres providing examination services for buses, light buses, taxis, goods vehicles, trailers etc.. Three of them are operated by the Vehicle Examination Division and one is operated by the contractor. There are 23 privately owned designated Car Testing Centres, providing annual examination for private cars and light goods vehicles not exceeding 1.9 tonnes.

The Vehicle Examination Division also monitors the maintenance of franchised buses and conducts spot checks on in-service franchised buses. The Division also assists the Hong Kong Police Force in examining the accident vehicles.

In 1999, the Division put great effort in collaborating with Environmental Protection Department as well as other departments and organisations in combating vehicle emissions. Initiatives among many others include strengthening the smoke test on diesel vehicles, encouraging the installation of diesel catalysts on franchised buses and the use of LPG on taxis.

The Division is now reviewing the regulatory system of the vehicle construction and maintenance in Hong Kong, and is trying to develop a new system which will be in line with those recommended by the United Nations Economic Commission for Europe.
