Affected Vehicle Identification Number (VIN)	List as below:
Description of Defect, how it came to light, and possible consequences if ignored.	Significant amounts of copper and molybdenum disulfide in the brushes in wipers motors can cause them to expand when exposed to sustained high ambient temperatures and humidity. This expansion can cause the brushes to jam inside their carriers causing the wiper motor to stop working.
Remedial Action	The wiper motor will be replaced with a new motor containing brushes made with less copper and no molybdenum disulfide.
