Description of Defect, how it came to light, and possible consequences if ignored.	<p>A faulty sealing ring might have been used for the chain tensioner on the engine. In exceptional cases, this could lead to escaping oil at the chain tensioner of the engine. If the oil level in the engine drops below the minimum level, a message appears in the display depending on the defined driving status. However, the loss of larger quantities of engine oil can also lead to pollution of the road surface and thus might pose a hazard for subsequent traffic. Furthermore, severe engine damage cannot be ruled out in case of major oil loss.</p>
Remedial Action	Replace the seal for the chain tensioner as a precautionary measure on affected vehicles.
