Subject	Fastener replacement - Battery cable front bulkhead studbox
Progress	Planning
Affected Vehicle Identification Number (VIN)	If vehicle bought from authorized Dealers in Hong Kong, please see the list as below; If your vehicle bought from Parallel Importer, and the vehicle Build Dates is within this period, please contact our Dealers or Bentley Motors China - Hong Kong regional office (Tel : 36989726).
Description of Defect, how it came to light, and possible consequences if ignored.	The 12V battery cable has a bolted connection where it passes through the front bulkhead on the right hand side. There is a possibility that this connection may be loose on a small number of vehicles. In most instances, this could lead to a situation where a customer would be unable to start the engine. However, in very rare cases, if the battery is significantly discharged and the vehicle is being operated under increased electrical load, a loose electrical connection can overheat whilst the vehicle is in use.
Remedial Action	The two nuts securing the battery cable either side of the front bulkhead studbox must each be replaced.
Build Dates	Manufactured from February 2011 to June 2014
Launch Date	1 st November 2015
Tentative Date of Recall Completion	31 st March 2016
