Affected Vehicle Identification Number (VIN)	List as below:
Description of Defect, how it came to light, and possible consequences if ignored.	The recall is related to driver's side Power Window Master Switch in which grease that have been applied inconsistently. During operation, debris caused by wear from the electrical contact points can accumulate between the terminals where the grease was insufficiently applied. A short circuit could form between the contact points by the debris and conductive moisture that may enter the module. If a short circuit occurs, the switch assembly may overheat and melt.
Remedial Action	Inspect or replace the power window master switch circuit board
