Subject	Manual Valve Lever in automatic transmission

Affected Vehicle Identification Number (VIN)	List as below:
Description of Defect, how it came to light, and possible consequences if ignored.	It is related to the Manual Valve Lever in transmission system. Due to the lack of strength of the pivot connection on the lever for the gear selection oil passage switch control, which is connected to the shift lever of the automatic transmission, friction from unexpected rapid shift operation may cause the pivot connection to rattle. As a result, there may be a possibility that the oil passage is unable to switch in accordance with the intended shift position and is therefore incompatible with the actual behavior of the shift position.
Remedial Action	Replace the manual valve lever of the automatic transmission
