<b>Dealer (phone no)</b>	Crown Motors Limited (Tel: 2880 4922)
<b>Subject</b>	Brake control module software update
<b>Progress</b>	<b>Running</b>
<b>Affected Vehicle Identification Number (VIN)</b>	List as below:
<b>Description of Defect, how it came to light, and possible consequences if ignored.</b>	It is related to the brake hold system which, upon activation, maintains brake application after the brake pedal has been depressed to keep the vehicle stopped when the transmission is left in a gear other than "Park" and "Reverse." Under certain conditions (for example, unfastening the driver's seat belt while the system is enabled), the system is designed to deactivate the brake hold function, sound a warning buzzer, display a message in the instrument cluster, and automatically set the parking brake. Due to improper programming of the brake control module, there is a possibility that the parking brake may not be set automatically when the system is deactivated by certain conditions as previously described. If this occurs, and the transmission is left in a gear other than "Park," the vehicle could creep forward or backward, increasing the risk of a crash.
<b>Remedial Action</b>	Inspect and, if necessary, update brake control module software
