<b>Description of Defect, how it came to light, and possible consequences if ignored.</b>	On gas filling type liftgate stay dampers it is possible that the end portion of external cylinder may be corroded due to external factor. If the vehicle continues to be used with such stay damper, the corrosion may progress over time, allowing the thickness of cylinder wall to decrease. In the worst case, the external cylinder may break off due to internal gas pressure.
<b>Remedial Action</b>	Replace stay dampers on both side with modified parts
