

Recall Detail

Ref No	10000750
Manufacturer	ASTON MARTIN
Vehicle Class	PRIVATE CAR
Model/Type	DB9, DBS, Vanquish, Virage
Dealer (phone no)	MF Jebsen Automotive Limited (2234 0562)
Subject	Change to the Battery Supply Cable Routing
Progress	Running
Affected Vehicle Identification Number (VIN)	List as below:
Description of Defect, how it came to light, and possible consequences if ignored.	<p>On the affected vehicles, it is possible in some circumstances that when the right front seat is operated to its fully rearward position that the seat's left runner can compress the battery supply cable. The battery supply cable is fully insulated but if the seat runner compresses the cable repeatedly, damage to the insulation of the supply cable can occur. When this happens, it is possible that the seat runner can conduct electricity from the battery supply cable. An earth wire that connects the seat runner assembly to ground will conduct the electricity to ground and begin to overheat. The heat will cause the ground wire to degrade, causing smoke to appear in the passenger compartment, and eventually, the copper of the ground wire will break and open the circuit.</p>
Remedial Action	We will install a cable guide onto the battery supply cable of all affected vehicles. This guide will move the battery supply cable to a different position so that it will not be possible for the seat runner to touch the cable. Also, the condition of the cable will be examined. If damage is found to the battery supply cable, more insulation will be applied to the cable.
Build Dates	Manufactured from Dec 2003 – Jun 2016
Launch Date	15 January 2018
Tentative Date of Recall Completion	September 2018
