Affected Vehicle Identification Number (VIN)	List as below: (Last Seven Numbers)
Description of Defect, how it came to light, and possible consequences if ignored.	The steering wheel in the vehicle which was installed at the factory may have been converted to a Sport or M Sport steering wheel which is also approved for the vehicle. The malfunctions may occur with the conversion of gas generator of the airbag module used, if this is exposed to high absolute air humidity over a period of year and/or there are quality deficiencies in the production of the gas generator. When the driver's airbag is triggered in the regular fashion, this may result in high internal pressure in the gas generator. In unfavourable cases, the gas generator may split and metal parts may cause - possibly fatal - injuries.
Remedial Action	Check the driver's airbag and replace it if necessary
