Description of Defect, how it came to light, and possible consequences if ignored.	<p>The material of two closure plugs on the engine might not withstand the maximum loads while driving. Thus, the material of the closure plugs might fail as a result of high engine oil pressures, which occur especially during dynamic driving.</p> <p>It cannot be ruled out that engine oil leaks from the plugs. Leaking oil might get onto the road, increasing the risk of a crash for the following traffic.</p> <p>If the engine oil level were to fall below a certain limit, a red warning message would be illuminated in the instrument cluster.</p> <p>If the warning message were to be ignored, the engine could run dry. In this case, a stalling of the vehicle cannot be ruled out due to an engine damage.</p>
Remedial Action	Rework the closure plugs on the engine of affected vehicles as a precautionary measure.
