

Recall Detail	
Ref No	10001053
Manufacturer	Toyota
Vehicle Class	Private Car
Model/Type	C-HR (ZYX10R)
Dealer (phone no)	Crown Motors Limited (Tel: 2880 4988)
Subject	Millimeter wave sensor inspection and initialization
Progress	Running
Affected Vehicle Identification Number (VIN)	List as below:
Description of Defect, how it came to light, and possible consequences if ignored.	The subject vehicles are equipped with a millimeter wave sensor (radar sensor) and a camera to detect objects, such as another vehicle, in front of the subject vehicle. These sensors support certain driver assistance features, including the Pre-Collision System (PCS). Under certain circumstances, the initialization of the radar sensor may not have been completed correctly at the vehicle assembly plant. If this occurs, the radar sensor would not be activated. In this condition, the PCS would not be able to detect a vehicle in front of the subject vehicle and would not provide warnings or braking assist, as designed, in certain driving situations that would otherwise result in a PCS activation. In addition, the vehicle would not display a message or indicator to the driver that PCS is not functional. An inoperative PCS, without a PCS malfunction indicator to the driver, may increase the risk of a crash in certain driving situations.
Remedial Action	Reprogram PCS module
Build Dates	10 June 2020 to 17 July 2021
Launch Date	8 Mar 2022
Tentative Date of Recall Completion	31 Dec 2024
