<b>Subject</b>	Fuel tank vent tube
<b>Progress</b>	Running
<b>Affected Vehicle Identification Number (VIN)</b>	List as below:
<b>Description of Defect, how it came to light, and possible consequences if ignored.</b>	Due to a possible compromise of the flange that connects the fuel evaporative emission control unit (fuel tank vent tube assembly) and the fuel tank. Due to the design of the flange, there is a possibility that a stress related crack could develop on the exterior surface of the flange. The crack could expand over time and may eventually allow fuel to leak from the crack. Depending on the amount of fuel that escapes from the crack and if it is in the presence of an ignition source, this could increase the risk of a vehicle fire.
<b>Remedial Action</b>	Replace the fuel tank vent tube assembly
