Description of Defect, how it came to light, and possible consequences if ignored.	We have determined that the 48V ground point in the engine compartment on certain vehicles unfortunately may not have been correctly fastened. In this case, the electric transitional resistance and temperature at this connection may increase. In this context, a risk of thermal damage cannot be completely ruled out.
Remedial Action	As a precautionary measure, to check the threaded connection of the ground point in the affected vehicles and carry out the required repair measures where necessary.
