

Recall Detail	
<b>Ref No</b>	<b>10001181</b>
<b>Manufacturer</b>	TESLA
<b>Vehicle Class</b>	Private
<b>Model/Type</b>	Model 3 / Model Y
<b>Dealer (phone no)</b>	3974-0251
<b>Subject</b>	Rectified the B-pillar blind camera function
<b>Progress</b>	<b>Running</b>
<b>Affected Vehicle Identification Number (VIN)</b>	Lists as below
<b>Description of Defect, how it came to light, and possible consequences if ignored.</b>	<p>the neural network responsible for detecting blindness was not scheduled to run on the B-pillar camera when Full Self Driving (FSD) was not toggled on. This means when Autosteer functions outside of Full Self Driving (FSD) are in operation, the system is not capable of detecting camera blindness. UNECE R79.03 require the system to provide a customer-facing alert of the camera blindness and that the system prevent the vehicle from performing a lane change maneuver during such condition. Tesla's type approval required each individual camera be assessed as an isolated component to trigger such conditions.</p> <p>Tesla's object detection system works collectively with a suite of cameras which have detection overlap and a video-based neural network with 6 seconds of memory to assure lane changes are safely performed even with the loss of the B-pillar camera. All other camera blindness detection remained and remains functional. As a result, an unreasonable risk to safety is not present if only the B-pillar camera is blocked.</p> <p>Our ref. SB-24-00-015</p>
<b>Remedial Action</b>	Tesla will release the new software to remedies the noncompliance.
<b>Build Dates</b>	Model 3 01 April 2023 – 07 August 2024 Model Y 08 May 2023 – 16 August 2024
<b>Launch Date</b>	15 August 2024
<b>Tentative Date of Recall Completion</b>	31 December 2024
