| <b>Description of Defect, how it came to light, and possible consequences if ignored.</b> | As part of this constant monitoring, we have found that the electrical connector for the transmission wiring harness may not have been processed correctly in certain vehicles. In this case, water may enter into the plug and lead to a short circuit over time. The short circuit may result in a thermal overload of the connector coupling after the vehicle has been parked. A subsequent risk of thermal damage cannot be ruled out.   |
| <b>Remedial Action</b>  | As a precautionary measure, we will replace the two-piece wiring harness including the connector coupling with a new one-piece variant on the affected vehicles.  |
