Description of Defect, how it came to light, and possible consequences if ignored.	As part of this constant monitoring, we have found that the software of the engine control unit in certain vehicles unfortunately might not meet specifications. In this case, an increase of exhaust temperatures and a damage of surrounding components (e.g. engine wiring harness, catalytic converter) might occur. A loss of propulsion without prior warning and an increased risk of thermal damage cannot be ruled out.
Remedial Action	As a precautionary measure, we will update the software of the engine control unit on the affected vehicles.
