Description of Defect, how it came to light, and possible consequences if ignored.	Be informed by our supplier TK Holdings, Inc. ("Takata") that specific climatic conditions may over time cause a chemical change in the propellant in the gas generator of certain Takata airbags. In the case of an accident with airbag deployment, this change could as a result - due to increased internal pressure - cause the gas generator to burst. In this case, this airbag would not display any restraint effect and the occupants would be at a risk of injury due to separating parts of the gas generator.
Remedial Action	As a precautionary measure, to replace driver's airbag in the affected vehicles.
