Description of Defect, how it came to light, and possible consequences if ignored.	<p>The control unit for the seat occupancy recognition on the front passenger seat of affected vehicles may not have been installed in accordance with internal specifications. This could cause the pressure hose on the control unit of the front passenger seat to kink.</p> <p>As a result, this control unit may incorrectly recognize a person as a child seat. This would result in the front passenger airbag being disabled. The risk of injury to the front passenger would thus be increased in the event of an accident.</p>
Remedial Action	Check the routing of the pressure hose on affected vehicles as a precautionary measure, and if necessary replace the pressure hose and seat recognition mat.
