Description of Defect, how it came to light, and possible consequences if ignored.	The oil feed line for the exhaust gas turbochargers may not be leaktight. This could result in oil leaking from the oil feed line. It cannot be ruled out that this oil may come into contact with hot component parts while the vehicle is in operation. This would increase the risk of fire.
Remedial Action	Replace the oil feed line of the exhaust gas turbochargers on affected vehicles as a precautionary measure
