Subject	Software update ESP control unit (5498904)
Progress	Completed
Affected Vehicle Identification Number (VIN)	<p>Regarding the chassis number of vehicle affected by this campaign , please refer to EITHER (1) or (2):</p> <p>(1) If vehicle was bought from Zung Fu or ever repaired under warranty in Zung Fu Service Centre, please see below the list of chassis numbers of identified and remaining vehicles.</p> <p>2) If vehicle was not bought from Zung Fu and never repaired under warranty in Zung Fu Service Centre, and the vehicle production date falls into that specified in "Build date", please contact Zung Fu Service Centres at above mentioned telephone numbers, or Mercedes-Benz Hong Kong Limited (Tel: 2594 8800) to clarify whether your vehicle is affect by this recall.</p>
Description of Defect, how it came to light, and possible consequences if ignored.	<p>The ESP software in affected vehicles may not meet the specifications. If a signal interrupts this process during the initiation of the BUS sleep, in certain cases the ESP control unit may not be reinitialized as intended. In this case, the brake lights would be permanently activated and a warning message about the brake light malfunction would be displayed in the instrument cluster. Furthermore, the ESP function would be deactivated and the parking brake could no longer be moved from its current position.</p> <p>As the parking brake is activated automatically when the door aperture is activated at the end of the parking process, it would normally not be possible to continue driving later if the fault described above were present. If the parking brake is not activated when leaving the vehicle, the vehicle could continue to be moved. The ESP function would not be available.</p>

	In this case, the accident hazard would be increased.
Remedial Action	Update the software of the ESP control unit on affected vehicles as a precautionary measure.
