

Notice

Application for allowing the rear axle weight excess of requirement for single-decked bus

- (1) **With effect from 26 July 2010**, the vehicle owner can make application to Vehicle Safety and Standards Division for allowing the maximum axle weight, up to 11.5 tonnes, for the rear axle of single-decked bus individually.
- (2) Before making the application, the applicant shall make sure, with the bus manufacturer, that the bus: -
 - (a) shall be with fully air-suspended construction for the rear axle; and
 - (b) of which, the design axle weight of the rear axle is higher than the request stated in the application.
- (3) Applicant can submit the application at ToKwaWan vehicle examination centre with the following documents:-
 - (a) application letter with listing:-
 - (i) bus model;
 - (ii) bus manufacturers; and
 - (iii) chassis number of the bus.
 - (b) bus manufacturer's document (such as the specification of suspension and axles or manufacturer's endorsement) , to prove that the bus meets the requirement stipulated in the (2) above.
- (4) The applicant will be informed in writing after the bus model passed the Type Approval if success.
