Video 3 - Making payment by QR code, and then making connection for remote payment via HKeMeter

Firstly, press either the left or right arrow button to select parking space A or B.

Then, press the button with a plus sign to select parking time.

And then, press the QR code button for payment by QR code and a QR code will be displayed on the parking meter.

Please open the mobile app of relevant payment means, e.g. mobile banking apps with "Faster Payment System" function, AliPayHK, WeChat Pay or Union QR, to scan the QR code for making payment.

Upon completion, the parking time purchased will be displayed on the parking meter.

Please press the left or right arrow button again to select the correct parking space, and then press QR code button to obtain another QR code for making connection for remote payment.

Motorists may open HKeMeter and follow the instructions to scan the QR code in order to connect his/her mobile phone with the parking meter to facilitate remote payment later.

The QR code will be displayed for about 20 seconds, which provides adequate time for motorists to complete scanning.
