Video 4 - Remote extension of parking time through using HKeMeter

To use HKeMeter to extend parking time remotely, motorists should connect his/her mobile phone with the parking meter through HKeMeter on site.

Please see Video 1,2 or 3 for details.

Firstly, open HKeMeter.

Select "Extend" in the payment page.

Press plus or minus button or roll the wheel to select parking time, and then press "Confirm".

The time shown on the wheel is for reference only. The system will automatically restrict a user to purchase up to a total of two sessions of "longest parking period" for each transaction of the parking meter concerned.

At present, the longest parking period allowed for each transaction is fixed at 30 minutes, 1 hour or 2 hours.

If the input information is correct, please select payment means, and then press "Purchase" to complete the payment.

Afterwards, HKeMeter will display the confirmation of extension of parking time. Please press "Finish" to return to the home page.
